Summary

8+ years of full stack experience developing scalable web apps. Experienced with many technologies including Vue, .NET, ASP .NET Core, API design, Node.js, SQL, and Typescript.

- Lead the design and implementation to rewrite a large business critical application.
- Lead the design and implementation of Vue 3 upgrade on a large production application with no down time and no major production bugs.
- Developed a live chat application for LEAD Technologies support and sales team to assist customers (still live 7 years later).
